

Insuring Livestock – the OBA tale:

In 2005 Brett insured the moderate frame, fertile, functional dams that were the cornerstone of O'Brien Angus being M19, R19, Q140 & S182. They were insured against the peril of Fire (Drought was not available then also) for \$8,750AUD each totalling \$35,000 for the 4 head of cattle – Brett has always believed in the importance of insuring Livestock, notwithstanding Drought needs to be added as an option in Australia – refer to this [update](#) refering 'farm packs'.
